

Welding arms for VEAW-K

SABATEC's welding arms for VEAW-K are available for Ø73 or Ø99, offering flexible and efficient solutions for various welding applications. These arms are designed for durability and precision, ensuring high-quality performance in demanding environments.

Push pawls, Z-bar, and head piece are available as standard spare parts, providing easy replacement and minimal downtime.

The welding arms can be used with mercury-free welding rolls, promoting a safer and more environmentally friendly operation.

Advantages

- Solid inner rounding shell
- Covered wire guide
- Simplified water cooling
- Prepared for monitor, gas, powder, lacquer
- Additional brake shell to catch rail
